PROFESSIONAL SUMMARY

Data Analyst with strong experience in Python, SQL, PowerBI, Tableau, and Excel, currently in my final year of Computer Science degree. Skilled at combining analytics and AI-driven tools to accelerate decision-making. Expanding into machine learning and advanced data science methods to drive data-informed decision-making.

SKILLS

Programming: Python, SQL

Data Tools: PowerBI, Tableau, Excel, Jupyter Notebook

Development: HTML, CSS, PHP, Django, Agentic AI

Soft Skills: Team Leadership, Agile collaboration

PROJECTS

Sales Performance Interactive Dashboard | PowerBI, DAX, AI Visuals, Data Storytelling

Designed and built a company's PowerBI sales dashboard to give insights into sales performance, which was very difficult with their scattered Excel reports.

Came up with one interactive dashboard accommodating all reports needed, with AI-driven root-cause analysis, reducing reporting preparation time from 4 hours to 1 hour.

AI-Driven Business Research & Analytics | Business Intelligence, AI

Conducted comprehensive market research to select the optimal city for a company's new branch, came up with its investor-ready business plan, company logo and physical store vision. All this within 1 hour as opposed to 4-6 weeks of traditional methods was impactful.

Smart Group Attendance System | Python, ML, GitHub

Led a team of 6 to build a contactless facial recognition system for group attendance. Automated recognition of up to 5 individuals simultaneously reducing roll-call time by 80%. Achieved ~95% accuracy eliminating proxy attendance.

EDUCATION

BSc. Computer Science | Kisii University, Kenya | Graduation: 2026

Certifications: Data, Full Stack, Python, Entrepreneurship (by eMobilis TTI, IBM, DataCamp)
